

Rohan Kulshrestha

rohanz@outlook.com | rohanjk.xyz | github.com/rohanz

EDUCATION

Nanyang Technological University

Bachelor of Engineering in Computer Engineering (Expected May 2028)

Singapore

Aug 2023 – Present

Raffles Institution

GCE A Levels

Singapore

Jan 2015 – Dec 2020

TECHNICAL SKILLS

Languages: Python, C++, Java, TypeScript, JavaScript, SQL, C

AI/ML: Machine Learning, LLM Fine-Tuning (QLoRA, DPO), Evals, RAG, AI Agents & Tool Calling, OpenAI APIs, Google Gemini (incl. Vision), Google ADK, LangGraph, Vector Embeddings, NLP, TTS

Web, Mobile and Audio: Next.js, React, React Native, FastAPI, REST APIs, JUCE, VST3/AU, real-time DSP

Data and Cloud: PostgreSQL, DuckDB, Redis, pgvector, Google Cloud (Cloud Run/SQL/Tasks), Supabase, Docker

Tools: Git, Linux, Pydantic, Asyncio, Playwright, Pandas, NumPy, Figma

EXPERIENCE

Software and AI Engineer Intern

May 2025 – Aug 2025

AlphaGeo

Singapore

- Designed and built an end-to-end ETL pipeline consolidating 11,000+ data center facilities from 6+ sources (Wikidata/SPARQL, OpenStreetMap, PeeringDB, news, reports) with geospatial + fuzzy-match deduplication.
- Developed a LangGraph agent (Gemini 2.5 Pro, Pydantic structured output) that autonomously locates market reports, plus a vision pipeline (Playwright + Gemini Vision) to extract data from web-only PDF viewers.
- Built a second pipeline tracking the global Tesla Supercharger network with schema-driven field-level change detection (SQLAlchemy reflection) and idempotent upserts for a full audit trail.

PROJECTS

CareerSphere - AI Career Exploration App | Python, OpenAI, DuckDB | Writeup

Jun 2026

- Won Champion (1st place) at the OpenAI x AI Singapore x PyCon SG 2026 Hackathon, in a team of two.
- Built an app that turns a resume into a navigable 3D map of Singapore's job market, grounded in 2,030 official SkillsFuture roles and 88,000+ daily-refreshed MyCareersFuture job postings in an in-process DuckDB snapshot.
- Designed it so "the data decides, the AI interprets": an OpenAI tool-calling agent orchestrates while deterministic Python owns skill matching, role-fit scoring, and gap ranking (vector embeddings); deployed on Cloud Run.

QuantLab - Trading Firm in Miniature | Python, C++, Fine-Tuning, Quant Finance | Writeup

Jul 2026

- Fine-tuned Qwen3 8B/14B (QLoRA, DPO, one RTX 4090) into a memo writer + repair model with a deterministic gate verifying every cited number: 50/50 held-out memos passed at 99.6% per-number accuracy, matching Claude Sonnet 5's 99.8%.
- Engineered a deterministic C++20 matching engine (limit order book, 10.4M ops/sec, hash-verified replay) and a risk gateway (exposure caps, kill switch, append-only audit log) driving live daily paper trading at a real brokerage.
- Built a backtesting engine that makes lookahead bias structurally impossible, Kalman-filter adaptive pairs trading, and momentum/low-volatility factor strategies, measuring survivorship bias at +4.6%/yr instead of disclaiming it.

BQST - Audio Mastering Plugin | C++, Real-Time Systems, Concurrency, JUCE | Writeup

Jun 2026

- Built and shipped a cross-platform native C++ application (VST3/AU/Standalone audio plugin) end to end: DSP core, custom GUI, and a signed, notarized universal macOS installer.
- Implemented the C++ DSP core from scratch (IIR shelving filters, nonlinear waveshaping for harmonic generation) on a lock-free, allocation-free real-time path with 8x oversampling; validated with pluginval at strictness 10.

YourCast - AI Podcast App | Python, Google ADK, Gemini, GCP | Writeup

Jun 2025 – Aug 2025

- Built and deployed a serverless full-stack app generating personalized 3-5 minute AI podcasts: 16,000+ articles ingested daily from 200+ RSS feeds, semantic deduplication with vector embeddings, and multi-agent script generation (Google ADK + Gemini).
- Parallelized text-to-speech across 8 workers for roughly 7x faster audio generation; deployed on Cloud Run, Cloud SQL, and Cloud Tasks, auto-scaling from 0 to 1000+ instances with sub-2-minute generation.

ADDITIONAL EXPERIENCE & ACTIVITIES

Specialist

Jan 2021 – Jan 2023

Singapore Armed Forces

Singapore

- Led and trained a 40-member artillery unit through live-fire operations and mission planning.

Music Production and Audio Engineering

- Composed, produced, mixed, and mastered original songs in Ableton Live (2M+ streams across platforms); hand-built custom audio gear (a microphone, an optical compressor) from analog circuitry and soldering.
